

# Power Cart Policies

If there has been a lot of rain please call the Pro Shop for the current status. We will do our best to provide information to all members and guests in a timely matter, however there may be times when a decision has to be made without advance notice in order to protect sensitive areas.

## Handicap Flag Rules

- All players requesting a Handicap Flag must produce a Government issued Blue Zone Parking Permit.
- All carts must stay at least 30 feet from greens and remain on cart paths around all tees. Do not drive cart between bunkers and the green.
- When any or all parts of the course are declared as cart path only for any reason you must remain on the cart path even when in possession of a Blue Zone Parking Permit.
- Cart must not be driven through traditionally wet areas that would normally be marked as Ground Under Repair, whether or not they are marked as GUR on that particular day.
- Privileges will be revoked if rules are not adhered to.

## 90 Degree Rule

On certain days our staff may implement a **90 Degree Rule** for Power Carts. This is done to minimize damage when the course is wet. When this is in place we ask you to please enter and exit the fairways at 90 degrees to the cart paths. The least distance you have to drive on the fairway the better.

## Cart Path Only Rule

When the course is extremely wet our staff will implement a **Cart Path Only Rule**. When the Cart Path Only Rule is in effect **no** carts will be permitted on the grass under any circumstance. This rule is only implemented when it is felt that cart traffic on the grass would likely lead to permanent turf damage.

## No Carts on Course Rule

In cases of extreme wetness, our staff may implement a **No Cart Rule**. When this is in effect, carts will not be issued under any circumstance.
